

The screenshot shows a Visual Studio Code editor with a file explorer on the left displaying a Terraform project structure. The main editor window shows the `playlist.tf` file with the following content:

```
1 resource "spotify_playlist" "TerraformPlaylist" {
2   name = "TerraformPlaylist"
3   tracks = ["0MTdYgTZ25slC06kvD0je"]
4 }
```

The terminal window at the bottom shows the output of the `terraform apply` command. It indicates that the state is refreshing and that Terraform will perform the following actions:

- Update in-place
- Update `spotify_playlist.TerraformPlaylist`

The terminal also shows the execution plan and the final state of the resources.
